

Create a simple cloud software application for Library book reservation system for SIMATS library using any Cloud Service Provider to demonstrate saas.

The image displays two screenshots of a web application for library book reservation, built using Zoho Creator. The application is titled 'library reg' and is in the 'Development' environment. The user is logged in as 'keerthi Reddy G'.

**Top Screenshot: Student Info Form**

The 'student info' form contains the following fields:

- student name (First Name, Last Name)
- date of birth
- student id
- Gender
- fathers Name (First Name, Last Name)
- course (Dropdown menu)
- department
- session (Dropdown menu)
- class roll no

**Bottom Screenshot: All Student Infos Table**

The 'All Student Infos' table displays the following data:

student name	student id	Gender	fathers Name	session	course	department
keerthi reddy	192224165	female	narayana reddy	cse	cse	AI&DS

The table shows 1 of 1 records. A blue '+' button is visible in the bottom right corner of the table area.
