

EXPERIMENT-15

Create a Simple Web Application using Java or Python and host it in any Public Cloud Service Provider (Azure/GCP/AWS) to demonstrate Platform as a Service (PaaS)

EXPERIMENT-15

Create a Simple Web Application using Java or Python and host it in any Public Cloud Service Provider (Azure/GCP/AWS) to demonstrate Platform as a Service (PaaS)

The screenshot shows the 'Create Web App' page in the Microsoft Azure portal. The browser address bar shows 'portal.azure.com/#create/Microsoft.WebSite'. The page title is 'Create Web App'. The 'Subscription' is set to 'Azure for Students' and the 'Resource Group' is 'varshitha'. Under 'Instance Details', the 'Name' is 'rishitha'. The 'Publish' section has three options: 'Code', 'Docker Container', and 'Static Web App' (which is selected). A 'Create' button is visible under the 'Static Web App' option. At the bottom, there are buttons for 'Review + create', '< Previous', and 'Next: Deployment >'. The Windows taskbar at the bottom shows the date as 18-10-2023 and the time as 01:19 PM.

The screenshot shows the 'Create Static Web App' page in the Microsoft Azure portal. The browser address bar shows 'portal.azure.com/#create/Microsoft.StaticApp'. The page title is 'Create Static Web App'. The 'Subscription' is 'Azure for Students' and the 'Resource Group' is 'varshitha'. Under 'Static Web App details', the 'Name' is 'rishitha'. The 'Hosting plan' section shows 'Plan type' set to 'Free: For hobby or personal projects'. At the bottom, there are buttons for 'Review + create', '< Previous', and 'Next: Tags >'. The Windows taskbar at the bottom shows the date as 18-10-2023 and the time as 01:21 PM.

EXPERIMENT-15

Create a Simple Web Application using Java or Python and host it in any Public Cloud Service Provider (Azure/GCP/AWS) to demonstrate Platform as a Service (PaaS)

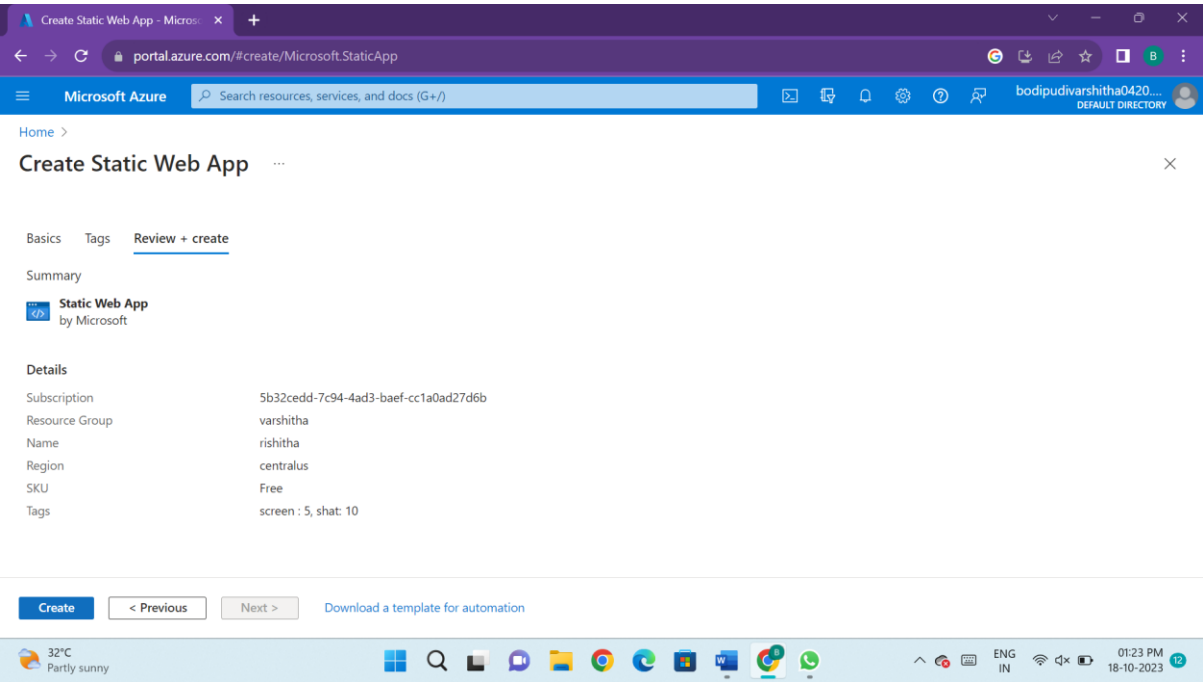

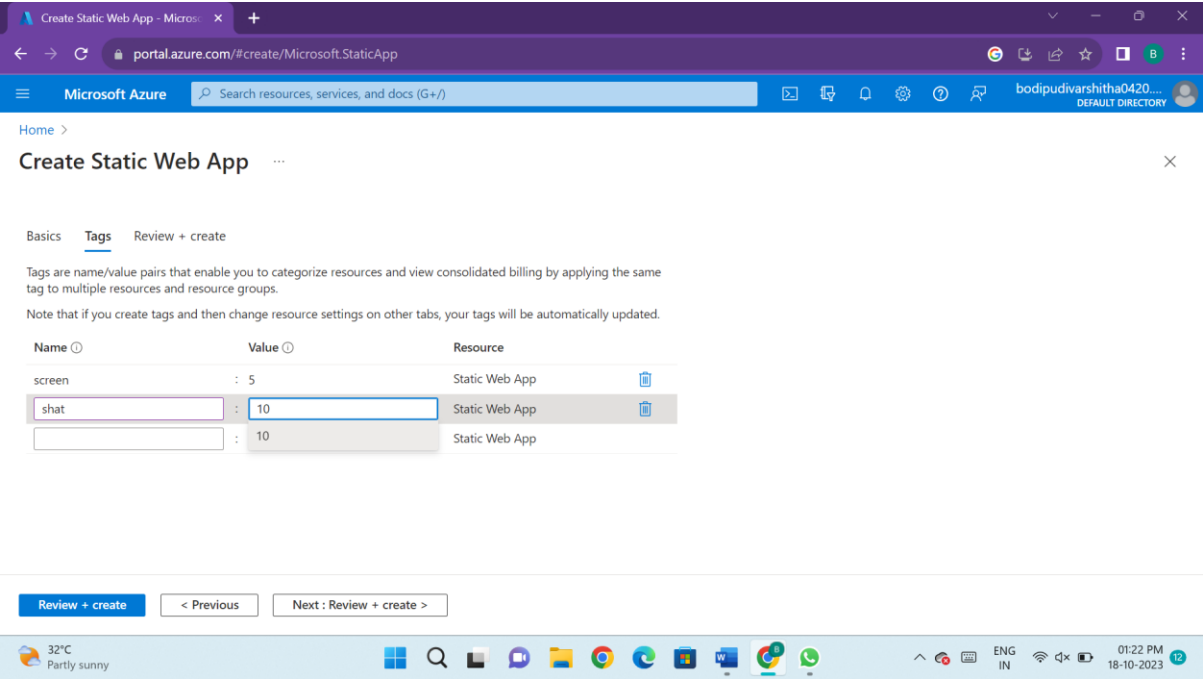

The screenshot shows the 'Create Static Web App' wizard in the Azure portal. The browser address bar shows 'portal.azure.com/#create/Microsoft.StaticApp'. The user is logged in as 'bodipudivarshitha0420...'. The wizard has the following sections:

- Plan type:** Two radio buttons are present. 'Free: For hobby or personal projects' is selected. 'Standard: For general purpose production apps' is unselected.
- Azure Functions and staging details:** A dropdown menu for 'Region for Azure Functions API and staging environments' is set to 'Central US'.
- Deployment details:** Under the 'Source' heading, three radio buttons are present. 'Other' is selected, while 'GitHub' and 'Azure DevOps' are unselected.

A blue information box with an 'i' icon contains the text: 'Select this option to use other deployment methods. After the app is created, open it and follow the instructions to deploy your app.' Below the form, there are three buttons: 'Review + create' (in blue), '< Previous', and 'Next : Tags >'. The bottom of the screen shows a Windows taskbar with a weather widget (32°C, Partly sunny), several application icons, and system tray icons including language (ENG IN), network, volume, and a clock showing 01:21 PM on 18-10-2023.
